

We claim:

1. A bar tool, comprising:  
a handle,  
a display for displaying a drink recipe, coupled to the handle; and  
5 a measuring device extending from the handle for measuring ingredients.
2. The bar tool of claim 1, wherein the measuring device comprises a first and a second measuring container.
3. The bar tool of claim 2, wherein the first measuring container has a volume capacity larger than the second container.
- 10 4. The bar tool of claim 1, further comprising a memory for storing a plurality of drink titles.
5. The bar tool of claim 4, further comprising an actuator for scrolling through the plurality of drink titles stored in the memory.
6. The bar tool of claim 4, wherein each drink title has an associated list of  
15 ingredients stored in the memory.
7. The bar tool of claim 6, further comprising an actuator for scrolling through the list of ingredients stored in the memory.
8. The bar tool of claim 1, further comprising a controller for determining text to be displayed on the display.
- 20 9. The bar tool of claim 8, wherein the controller displays a next ingredient in the recipe when the sensor senses rotation of the handle.
10. The bar tool of claim 1, wherein the display displays text.
11. The bar tool of claim 1, wherein the display displays icons.

12. The bar tool of claim 4, further comprising a communications port for changing the memory.

13. The bar tool of claim 1, wherein the measuring device is removable from the handle.

5 14. The bar tool of claim 1, wherein the measuring device is rotatable in the handle.

15. A bar tool, comprising:

a handle,

a memory disposed in the handle, the memory storing at least one drink title and an associated drink recipe,

10 a display capable of displaying the drink title and the associated drink recipes coupled to the handle; and

a measuring device extending from the handle for measuring an ingredient listed in the drink recipe.

15 16. The bar tool of claim 15, further comprising an actuator for scrolling through a plurality of drink titles stored in the memory.

17. The bar tool of claim 15, further comprising a communications port for changing the memory.

18. The bar tool of claim 15, wherein the measuring device is removable from the handle.

20 19. The bar tool of claim 15, wherein the measuring device is rotatable in the handle.

20. A tool, comprising:

a handle,

a display for displaying a recipe, coupled to the handle; and

a measuring device extending from the handle for measuring ingredients.

21. The tool of claim 20, wherein the measuring device comprises a first and a second measuring container.

22. The tool of claim 21, wherein the first measuring container has a volume capacity  
5 larger than the second container.

23. The tool of claim 20, further comprising a memory for storing a plurality of recipes.

24. The tool of claim 23, further comprising an actuator for scrolling through the plurality of recipes stored in the memory.

10 25. The tool of claim 23, wherein each recipe has an associated list of ingredients stored in the memory.

26. The tool of claim 25, further comprising an actuator for scrolling through the list of ingredients stored in the memory.

27. The tool of claim 20, further comprising a controller for determining text to be  
15 displayed on the display.

28. The tool of claim 20, wherein the display displays text.

29. The tool of claim 20, wherein the display displays icons.

30. The tool of claim 23, further comprising a communications port for changing the memory.

20 31. The tool of claim 20, wherein the measuring device is removable from the handle.

32. The tool of claim 20, wherein the measuring device is rotatable in the handle.

33. The tool of claim 20, wherein the recipe is selected from the group consisting of a plant or animal feed or treatment, color, baking and cooking.

34. A tool, comprising:
- a handle,
- a memory disposed in the handle, the memory storing at least one title and an associated recipe,
- 5 a display capable of displaying the title and the associated recipes coupled to the handle;
- and
- a measuring device extending from the handle for measuring an ingredient listed in the recipe.
35. The tool of claim 34, further comprising an actuator for scrolling through a
- 10 plurality of titles stored in the memory.
36. The tool of claim 34, further comprising a communications port for changing the memory.
37. The tool of claim 34, wherein the measuring device is removable from the handle.
38. The tool of claim 34, wherein the measuring device is rotatable in the handle.
- 15 39. The tool of claim 34, wherein the recipe is selected from the group consisting of a plant or animal feed or treatment, color, baking and cooking.
